INDUSTRIAL SYSTEMS | ROBOTICS & AUTOMATION

WorldSkills Shanghai 2026 Champion Credential - Autonomous Mobile Robotics

+1 876 857-3390 | lloydpusey16@gmail.com | [LinkedIn](#) | Jamaica

PROFILE Industrial Systems student and robotics technician with hands-on experience in autonomous mobile robotics, CAD/rapid prototyping, UAV restoration, networking, computer systems and industrial troubleshooting. National Skills gold medalist and Jamaica representative at WorldSkills Shanghai 2026.

EDUCATION

Bachelor's Degree in Industrial Systems *Sep 2026 - Expected 2030*

Caribbean Maritime University (CMU), Palisadoes Campus

Autonomous Mobile Robotics - Level 3 *Oct 2024 - Sep 2026*

HEART College of Innovation & Technology (HCIT)

- Job Certification in Autonomous Mobile Robotics; PLC Programming and AMR Technician certifications pending.

Secondary Education *2018 - 2023*

Rusea's High School

Grade 12 / CAPE Studies *2023 - 2024*

Green Island High School

- Cadet experience; progressed to approximately Sergeant / Star 3 level.

WORLDSKILLS & COMPETITION EXPERIENCE

WorldSkills Shanghai 2026 - Autonomous Mobile Robotics *2026*

Team Jamaica

- Selected for Team Jamaica after earning 1st place and a gold medal at the National Skills Competition with HCIT teammate Ryan Gibson.
- Completed approximately six months of preparation, including multi-week training camps at HCEMET; placed 3rd in June international trials involving teams including Singapore and Brazil.
- Focused on mechanical and functional development while teammate Antonio Rolong concentrated primarily on software.
- Designed the OMS, claw/gripper, wire-management system and onboard baskets using hand sketches, Autodesk Fusion and 3D-printed prototypes.

PROFESSIONAL EXPERIENCE

Independent Technical Services *2026 - Present*

Raye's Technical Solutions - T/A Rayon-Jai Pusey

- Build, diagnose and repair desktops/laptops; perform Windows installations; source monitors/components; and support computer-lab deployments for clients including schools.
- Deployed commercial CAT6 network and CCTV infrastructure with 13 cameras, NVR, network switch and wireless access points.
- Installed and networked a Xerox AltaLink C8700 across six office workstations, including IP configuration, drivers and testing.
- Diagnosed a zinc-cutting machine fault over three days, isolated a failed encoder wheel and completed the replacement while gaining practical relay-logic experience.

Industrial Systems | Robotics & Automation

SELECTED ENGINEERING PROJECTS

UAV Restoration & GPS Navigation

HEART College of Innovation & Technology

- Worked with Ryan Gibson to assess, clean and rebuild Hurricane Melissa-damaged/dismantled drones, returning two UAVs to functional condition.
- Developed one restored UAV with GPS capability and goal/waypoint navigation before the project period ended.

WorldSkills AMR - OMS & Mechanical Design

Team Jamaica

- Translated competition requirements into mechanical concepts, sketches, CAD models and 3D-printed components; contributed to functionality brainstorming and physical-system integration.

Commercial Network & CCTV Infrastructure

Raye's Technical Solutions

- Planned cable routes, fished and terminated CAT6, installed cameras, and configured the NVR, network switch and access points for a commercial property.

Industrial Zinc-Cutting Machine Diagnostics

Independent Client Project

- Systematically traced a measurement/cutting fault to a failed encoder wheel and restored the measurement system through component replacement.

TECHNICAL SKILLS

Robotics & Automation: Autonomous mobile robotics, OMS/gripper design, mechanical integration, UAV restoration, GPS navigation, introductory PLC and relay logic.

CAD & Fabrication: Autodesk Fusion, hand sketching, 3D printing, rapid prototyping, welding, engraving equipment and mechanical assembly.

Programming & Computing: Java, PC building, desktop/laptop troubleshooting and repair, Windows installation/configuration, basic iPhone modular repair.

Networking & Infrastructure: CAT6 installation/termination, CCTV, NVR configuration, switches, wireless access points, network printers and computer-lab setup.

Productivity & Creative: Microsoft Office, Canva, graphic design and video editing.

ENTREPRENEURSHIP & CREATIVE WORK

Design & Custom Printing Services

Raye's Printing Services - T/A Rayon-Jai Pusey

- Create graphics for mugs, cups and plaques; produce vinyl apparel; and coordinate bulk custom-shirt sourcing through overseas manufacturers.

CREDENTIALS

- Job Certification - Autonomous Mobile Robotics
- PLC Programming Certification - Pending
- AMR Technician Certification - Pending
